"Embrace the future of AI-powered media and explore a world of endless possibilities."

Our Core Services

Our project is built upon fundamental principles that underpin our dedication to fostering innovation, enabling users, and providing effortless entry to a realm of knowledge. Delve into the sections below to discover the foundational elements that form the guiding philosophy of our project:

User-Centric Experience

Offering seamless access to live news channels and a variety of interactive feature

Innovation in Streaming

Live news streaming with national and international channels, in both single view and multi-view modes

Advanced Technology Integration:

Speaker recognition technology and transcription capabilities, allowing them to personalize content and identify up to 15 distinct speakers.

Effortless Access to Archives

Enables users to easily access saved clippings, tickers, and screenshots, allowing them to revisit important moments.

Seamless Language Translation

Instant Multilingual Translation for various text formats, expanding linguistic boundaries.
